## MixMatic - Mixing

### MixMatic M6008

#### ***Item number/s:***

6400114

#### **Fully automatic continuous mixer for binder and rubber granules; prepared for connection of the material component (gravel unit).**

Our most powerful mixing machine for 1-component binder and rubber granulate is equipped with a material container with 2,500 l capacity. The container can be loaded with rubber granulate either with a Big Bag or a shovel loader. For all pumps and electric motors for the dosing of the components, mixing ratios can be precisely adjusted and consumption levels can be evaluated on the regular basis.

The machine is operated by a full-graphic touch-screen control unit. Afterwards the mixer is switched on and off manually by means of the manual control panel. The maximum mixing capacity of the MixMatic M6008 is 400 kg/min. The levels of the components are monitored by sensors and signals. An additional large material container with a capacity of 1,600 l is used for mixing of materials for elastic base layers, such as 1-component binder, rubber granulate and gravel.
