EXCLUSIVELY FOR OUR CUSTOMERS: THE SMG CHECK-UP SERVICE 2022

On the construction site, it can happen that your investment is damaged in the hectic everyday life. But now the year is coming to an end and the last construction sites will be completed in the near future.

Use the "quiet time" now to secure the value of your investment in the long term and to be ready for the next season. With our tried-and-tested SMG Check-Up Service, we will put your machinery under the microscope and maintain it with the service work we recommend.

Wondering how our service works? Very simple and uncomplicated:

- just send us a few pictures of your SMG machines
- We will provide you with a detailed list of the recommended spare parts and working time
- the workload of the service is assessed by us
- followed by our recommendation: the machine can be serviced by you or it should come to us for SMG service

This gives you the security of being able to work worry-free with your machines in the upcoming season. Even for older models, we still guarantee you an availability of spare parts that you will not find anywhere else.

However, there are exceptional cases, because no matter how good your equipment is and how well you have maintained your machines, during the "heat of the battle" it can happen that even SMG equipment gets problems. But SMG also offers an individual emergency spare parts kit for your SMG machines.

Emergency kit for our PlanoMatic P928

The advantages are obvious:

- low freight charge
- spare parts always available on site
- including spare part drawing and inventory list
- including emergency parts to keep your equipment running
- kit individually composed for you according to the equipment ID
- less expensive downtime on jobsite

We look forward to hearing from you, whether for our check-up service or our emergency kit, and we wish you continued success and lots of joy with your world-leading machines from SMG.
