Important milestone:

Topping out ceremony for our new hall with metal construction 2020

On the 45th anniversary of the company, we were able to celebrate the topping out ceremony for our new building which is 72 m long and 30 m wide. The shell of the building with almost 2,000 m² of floor space has now been completed. It represents another milestone in the company's history.

Despite its weight of 50 tons, the filigree and optically light-weight steel support structure is architecturally a eminent structure that was created according to the latest energetic and technical knowledge and is equipped with the latest control technology.

The 268 m³ floor panel consists of 620 tons of concrete plus 12 tons of steel reinforcement and is designed for high traffic loads. An industrial floor heating system was integrated for a literally good working atmosphere. For these and other installations, 13.5 kilometers of cables and lines with cross-sections from 0,6² to 185² were laid.

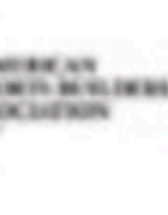

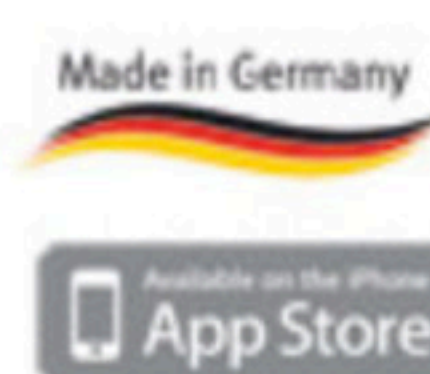

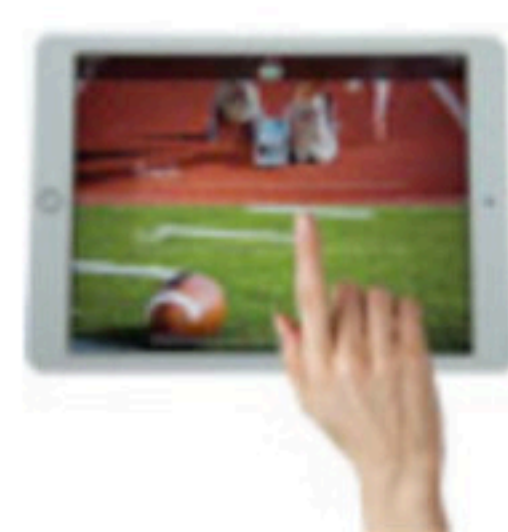

With the installation of an additional roof top solar plant with an output of 368.28 KWp, SMG now has a total of 573 kWp of output for its own power supply. This corresponds to approximately 500,000 kWh of generation per year, i.e. 0.5 megawatts.

With this investment, we have again significantly increased SMG's production capacity and created the basis for more jobs. The expansion of space has also made it possible to significantly enlarge SMG's metal works. Soon there will be more than three times as many welding workstations with the latest welding processes. A 6 kW laser cutting system with an automatic material tower and a fully automatic folding bench with automatic tool change ensure precision work. A powder coating system is also planned in this new area, which is expected to go into operation as early as 2021.

Our credo and quality promise is „Made in Germany“. The motto is therefore insourcing instead of outsourcing. So that we will be even better positioned for customers in the future and can serve their needs faster and more flexibly.

We will keep you updated on this matter.
