## LineStar LS1

### ***Item number/s:***

6214790

### **Pocket-striping machine for synthetic sports surfaces and artificial turf.**

### **Airless battery-powered, 2 transport trolley 23+29 kg.**

LineStar LS1 sprays 50 - 120 mm lines and markings on sports surfaces. Its airless pump operates on a commercially available 12V vehicle battery (not in the scope of delivery). The device is capable of utilizing the colour directly from the original container. The battery duration is up to 5 hours; then it can be recharged or replaced. Propelled self-cleaning outer discs made of spring steel produce most precise lines with no overspray.

The pump components and the gun unit are large series products used worldwide. LS1 is extremely compact and lightweight and can be transported in two special roller suitcases that weigh 29 kg and 23 kg. That way its weight does not exceed the general transport terms and conditions of the airlines, and its contents is not considered as dangerous goods. That way LS1 is the perfect companion for a professional lining machine operator.
