MixMatic M1100L

MIXMATIC - MIXING

Mixing shovel for binder and rubber granulate.

The M1100L mixing shovel homogeneously mixes materials for sports surfaces such as granulate, gravel, cork and PU coatings. It has a mixing capacity of 150kg/2min with a capacity of 300 liters. The M1100 is also ideal for coatings for industrial floors. The robust mixing shovel is designed for the extremely tough demands of continuous use on construction sites. Its main advantages are the low filling height, the low weight of only 210kg and the adjustable mixing tool.

The M1100 can be operated on carrier vehicles with a hydraulic output of 90 liters per minute at approx. 120 bar (max. 200 bar). The mix is mixed on the way to the unloading point and delivered there in one pan or in portions.
