MixMatic M6008

MIXMATIC - MIXING

Fully automatic continuous mixer for binder and rubber granules; prepared for connection of the material component (gravel unit or PU-unit).

Our most powerful mixing machine for 1-component binder and rubber granulate is equipped with a material container with 2,500 l capacity. The container can be loaded with rubber granulate either with a Big Bag or a shovel loader. For all pumps and electric motors for the dosing of the components, mixing ratios can be precisely adjusted and consumption levels can be evaluated on the regular basis.

The machine is operated by a full-graphic touch-screen control unit. Afterwards the mixer is switched on and off manually by means of the manual control panel. The maximum mixing capacity of the MixMatic M6008 is 400 kg/min. The levels of the components are monitored by sensors and signals. An additional large material container with a capacity of 1,600 l is used for mixing of materials for elastic base layers, such as 1-component binder, rubber granulate and gravel.

Item number/s: 6400114

Drive Electric motors infinitely adjustable by means of a frequency converter

Performance 23 kW (31,3 HP) / 400 V / 50-60 Hz

Mixing capacity 400 kg / min

Weight Basic mixer: 2,000 kg
Gravel unit: 660 kg

Dimensions Basic mixer: L 3,500 x W 1,900 x H 2,850 mm
Gravel unit: L 2,450 x W 1,000 x H 2,950 mm
