PlanoMatic P211

PLANOMATIC - PAVING

Semi-automatic paver for multipurpose sports surfaces, playgrounds, runways and jogging tracks.
Working width 1,100 mm (variable), area performance 290m²/h.

P211 is driven by an electrical gear motor, and thanks to the frequency converters, its paving speed is variably adjustable. The steering drawbar is equipped with operating elements for driving and the oscillation of the screed. Lateral pressure on the steering drawbar determines the travel direction of the machine.

The compaction of the material as well as the installation thickness can be changed manually. Therefore, this lightweight machine can easily be operated by one person.
