Decompactor DC1500

DECOMPACTOR - MAINTENANCE

Pull behind equipment for tractors for loosening infill material in artificial turf and to upright fibers.

The device is suitable for applications such as long-pile football turf and short-pile tennis turf.

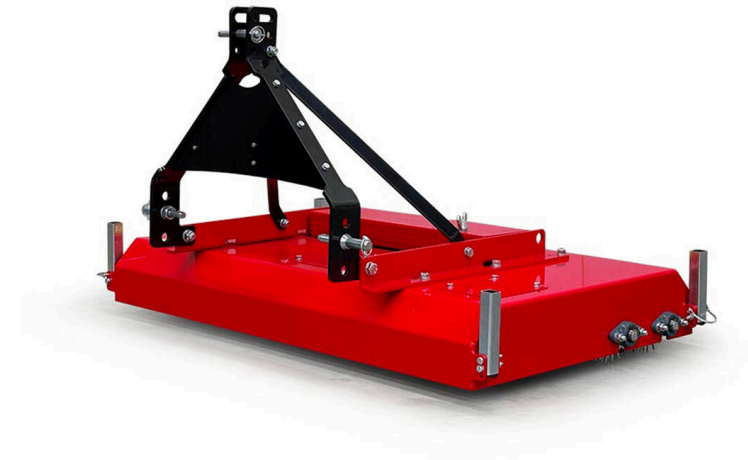

It is equipped with six ground-driven spike rollers, which, through a special gear ratio, loosen the infill material in the artificial turf and simultaneously upright the fibers.

The maximum working depth of 3.5 cm can be precisely adjusted via the rear three-point linkage.

With a recommended working speed of 7 to 12 km/h and a working width of 1,500 mm, the DC1500 offers high area performance.

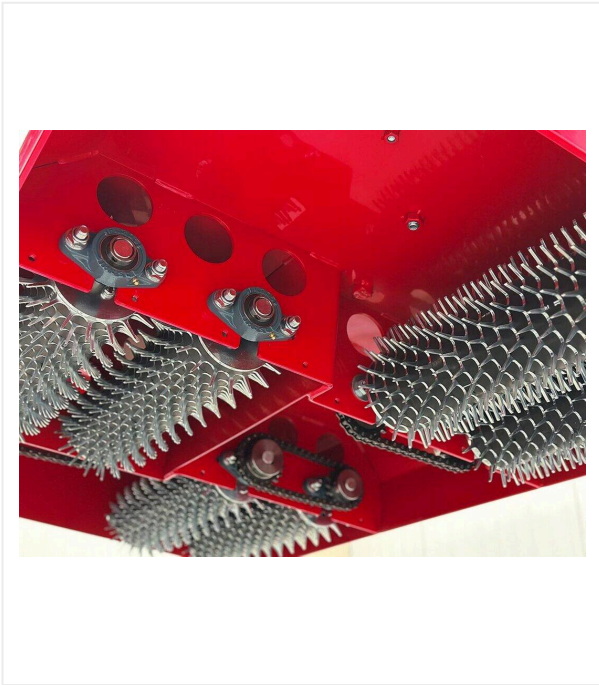

It is compatible with common municipal tractors with a minimum engine power of 20 hp.

For convenient storage, the DC1500 features foldable support feet.

DECOMPACTOR - MAINTENANCE

Efficient

6 spike rollers with different acceleration rates.

Precise

The spike rollers, equipped with teeth, create a slight shaking effect that loosens the infill material.

Practical

The working depth is adjusted via the rear three-point linkage.
