TurfBoy TB1

TURFBOY - MAINTENANCE

Ride-on machine for the care of artificial turf.

TurfBoy TB1 is driven by a 1-cylinder 12,2 kW (16,6 HP) air-cooled petrol engine. The ground-driven rotary brush TurfScout TS700 eliminates suspended particles, abrasion and dirt particles from the top surfaces. Its working width is 700 mm. The vibrating screen can be precisely adjusted, with variable settings from 4 to 10 mm, depending and in accordance with the condition of the infill material. The now cleaned infill material will be dosed and returned to the system as well as the fibre will be put upright again. TurfBoy TB1 is equipped with a drag brush and a hitch to pull additional attachments like triangular brushes, magnets or the ground-driven Beltspreader BS800.

The working width of the drag brush can be extended by putting in additional brushes.

TurfBoy TB1 is equipped with a rake and a perforated shovel for infill to clean the inside of goal areas. The rear garage folds out and contains brackets for additional tools, 2 dirt pans and a work platform that can be used for the transport of the foldable triangular brush DB1000F.
