# TurfCare TCA1400

TURFCARE - MAINTENANCE

## Ground driven, tow-behind device for the cleaning and care of artificial turf.

TurfCare TCA1400 maintains any kind of infilled and unfilled artificial turf systems. The wheel drive makes the equipment independent from any hydraulic or power shaft drives. Therefore the TurfCare can be pulled by various vehicles such as small compact tractors or quads.

The working depth can be precisely set and locked via two adjusting spindles.

The vibrating screen can be precisely adjusted with variable settings from 4 - 10 mm depending on the degree of pollution and the grid size of the infilling material.

For the pass of narrow doorways the two transport rollers can be folded out and the tow bar can be raised up.

For safe and comfortable road transport, the TCA1400 can also be retrofitted with a unique three-point hitch (optional). Toll-free changeable from 3-point to drawbar.
