TurfKing TK1100 / TK1502 / TK1802

TURFKING - MAINTENANCE

Tractor device for the cleaning and care of artificial turf.

TurfKing TK1502 brush and vacuum system guarantees clean sports surfaces and optimum playing conditions. Conventional brush rows and/or drag mats are not suitable for thorough cleaning of floor coverings/deep cleaning and loosening of sand-filled and/or rubber-filled artificial turf. The 3-point rear-mount type accessory for compact tractors goes with any type of tractors with a power of at least 20 to 25 HP and combines all important basic functions in one machine. The device compact and easy to connect.

With the TurfKing, the required working depth can be precisely set via adjusting spindles - for all work operations, so that each individual function can be separately adjusted and carried out to suit the corresponding turf conditions. The polyester filter cartridges that are used are designed for long-lasting use and are de-dusted continously.

SMG dust filters installed by SMG comply with DIN EN60335-2-69/dust class "M" and EN779 "F8" or "F9". Dust with a high proportion of fines as well as granulate/fibre abrasion (microplastics) are extracted via the powerful turbine and bound in the filter.
