EASY REFURBISHMENT OF SYNTHETIC SPORTS COURTS WITH THE RAUMATIC SERIES FROM SMG.

Nowadays, the renovation of sports surfaces by removing the top layer and recoating is becoming more and more important as an alternative to a complete renewal. This saves considerable costs and material and at the same time protects the environment.

With our RauMatic series, the original thickness and technical properties of the covering are retained. The solution for milling off the coating of elastic PU sports surfaces is the RauMatic R400.

Technical details R400

- Working width: 400 mm
- Removal depth: up to 10 mm
- Integrated height adjustment for level installation
- Area performance: 440 m²/h (at 4 mm milling depth)

[VIDEO R400](#)

Our product range is supplemented by our hand-held RauMatic R125 - a milling/cutting machine for the precise and efficient milling of sports surfaces and multi-purpose playgrounds. Thanks to its simple and agile handling, milling is possible right up to the curb.

Technical details R125

- Working width: 15/30/45 mm - 135 mm
- Removal depth: 0 - 5 mm
- Infinitely adjustable milling depth
- Cuts from 0 - 17 mm possible (when using only one milling disc)
