

passion for sports grounds

Dear customers, dear ladies and gentlemen,

The quiet days are coming – time to think about a brand new development in the cleaning sector:

The revolutionary world first and absolutely cleanest solution for Track & Turf ever: The complete system SMG WashMatic WM800 and ClearMatic CM180

The pioneering complete system SMG WashMatic WM800 with ClearMatic CM1800 cleans synthetic sports floors more cleanly than any other system ever before. The new machine duo caused a sensation at the leading global trade fair FSB in Cologne because it takes the cleaning of sports surfaces and waste water treatment to a whole new level. With this new process technology, not only do the sports areas shine in a new splendor, but the waste water that accumulates is also cleared.

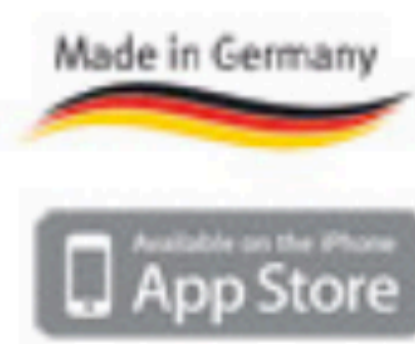

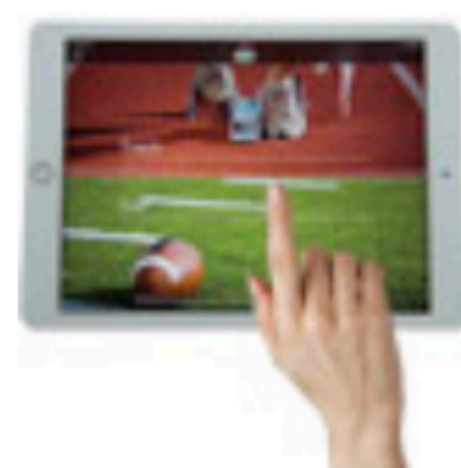

The WashMatic WM800 cleaning machine cleans synthetic sports surfaces such as unfilled artificial turf, running tracks, multi-purpose playing fields or similar surfaces. The ClearMatic CM1800 mobile treatment system thoroughly removes pollutants from the dirty water from the cleaning machine. With a multi-stage process, metals and microplastics are practically completely removed and the water is treated in such a way that it can be returned to the WM800 as crystal clear and used for cleaning. With this closed cycle, SMG is setting another example of environmental awareness and is once again setting standards on the world market.

An exertion video of this groundbreaking complete system from SMG can now be seen on YouTube:
