

passion for sports grounds

INSITU INSTALLATION OF ELASTIC LAYERS FROM THE PLAYGROUND TO THE STADIUM.

Whether popular sport or top-class sport according to the strict specifications of the umbrella organization of all national sports associations for track and field: SMG uses expert knowledge and experience to develop and manufacture pavers that guarantee functionally and aesthetically incomparable quality. They stand for absolutely flat installation of elastic layers and elastic base layers, athletic tracks and multi-purpose playing fields.

Today there is a product range of seven fully and semi-automatic paving machines with the sophisticated SMG technology available, whose extremely precise paving accuracy and highest laying performance result in a perfectly homogeneous surface quality. Our machines are used successfully worldwide and, with working widths from 1,100 to 3,600 mm, master every paving situation and requirement.

As an inventor, pioneer and market leader in machines for sports grounds, our promise is: SMG pavers stand for absolutely professional installation. They guarantee optimal training and competition conditions for amateurs in the leisure sector as well as for professionals in high-performance sports.

Choose the type that meets your requirement profile and use Augmented Reality (AR) to get to know the knowledge and skills that are in every machine down to the last detail.

More information on technical details and the respective AR applications can be found here:

PlanoMatic P936

Working width: up to 3,600 mm (variable)

Area performance: max. 970 m²/h
