

passion for sports grounds

PRODUCT INFORMATION:
CARPETWONDER CW95

Dear customers,

you are interested in the SMG CarpetWonder but haven't been able to make a decision yet? Then you will now receive an important decision-making aid.

The SMG CarpetWonder CW95 has been specially developed for cleaning tennis hall floors and indoor padel tennis courts with sand or granulate interspersed.

Our multifunctional special machine completes four work steps at once:

- Cleaning of the tennis court floor
- Picking up granulate in the outside area and transporting them back towards the center of the court
- Extraction of dust and ball abrasion as well as removal of stones and other coarse dirt
- returning of precisely dosed granules (through variable vibration frequency of the vibrating screen)

Despite its considerable working width of 700 mm and an area coverage of up to 600 m²/h, the CarpetWonder is extremely manoeuvrable in operation thanks to its compact design and can therefore also be used in confined spaces.

The electric motor enables low-noise operation so that tennis teams on neighboring courts can concentrate on their match undisturbed.

Would you like to see the CarpetWonder in action?
