## SMG TURFCARE

BEST POSSIBLE CARE FOR ARTIFICIAL TURF SYSTEMS.

**ARE YOU INTERESTED IN OUR TURFCARE? WE MAKE YOUR DECISION EASY: THE ALL-IN-ONE SOLUTION FOR CLUBS AND COMMUNITIES WITH ARTIFICIAL TURF SYSTEMS.**

**SMG is the leading manufacturer of cleaning and maintenance machines for synthetic sports surfaces. We offer you a compact and efficient solution for all artificial turf systems.**

SMG TurfCare cleans and cares for the surface of all filled and unfilled artificial turf surfaces. Its wheel drive makes it independent of hydraulic or PTO drives. This means that the TCA can be towed by a wide variety of vehicles such as small tractors or even quads.

#### **SMG TurfCare benefits:**

- cleaning and maintenance of all artificial turf systems including alternative filling materials such as cork
- suitable for towing vehicles of all types (quads, small tractors, etc.)
- independent of hydraulic/PTO drive
- precisely adjustable working depth
- the working depth of the steel tines can be adjusted to loosen the infill material
- infinitely adjustable vibrating screen (variably adjustable screens for all filling systems) separates dirt from the infill material while at the same time returning the infill material or reducing the discharge of infill material and microplastics
- individually adjustable to the degree of soiling/grain size of the infill material
- wheel-driven rotary brush for gently picking up surface dirt
- floating squeegee strip for brushing up the artificial turf fibres
- optional magnetic strip for picking up metal objects
- compact dimensions and fold-out transport wheels for enormous ground clearance

With regular use of the TurfCare, the interval - a basic and deep cleaning that is usually expensive for you - can be significantly extended. Furthermore, the lifespan of the artificial turf is significantly increased.

**Demo videos about the TurfCare can be found here:**
