## Introducing the TurfMuncher TM2000D: Your Ultimate Solution for Artificial Turf Removal

**SMG proudly presents the new generation of the TurfMuncher TM2000D – a globally unique self-propelled machine for efficient and precise removal of artificial turf. Revolutionize your turf removal process with the TM2000D.**

### Unprecedented Speed and Performance

The comparison between the latest TurfMuncher TM2000D and the previous model with the smaller engine yields stunning results. With 30% more horsepower, the new generation delivers a corresponding 30% increase in area performance! In fact, the time per roll has been reduced from 7 minutes to just 4 minutes, making turf removal faster and more efficient than ever before.

### Unmatched Efficiency and Precision

With a working width of 2,000 mm, the self-propelled TurfMuncher TM2000D winds artificial turf into 2-metre compact rolls and efficiently removes infilling material simultaneously. Designed to streamline turf removal operations, the TM2000D is driven by a powerful 35 kW (46.2 HP) water-cooled diesel engine.

### Electro-Hydraulic Control for Seamless Operation

All functions of the TM2000D are electro-hydraulically controlled, ensuring precise and responsive operation. The machine is conveniently controlled from a pivoting control panel, allowing operators to easily manoeuvre and adjust settings as needed.

### Designed for Sensitive Substructures

The TM2000D is engineered with weight, surface pressure, and steering capabilities optimized for use on sensitive substructures, such as elastic layers. This ensures minimal impact on the underlying surface during turf removal operations.

### Enhanced Convenience and Versatility

Featuring a discharge height of 2.4 metres, the conveyor belt of the TM2000D facilitates easy pick-up of infilling material by shovel loaders, dumpers, or BigBags. The conveyor is also 180° traversable, allowing operators to work around edges and corners with ease.

### Elevate Your Turf Removal Process with SMG

Whether you're reclaiming turf on sports fields, playgrounds, or landscaping projects, the TurfMuncher TM2000D is your ultimate solution for efficient and effective turf removal. Experience the power, performance, and reliability of "Bea" and elevate your turf reclamation efforts to new heights.

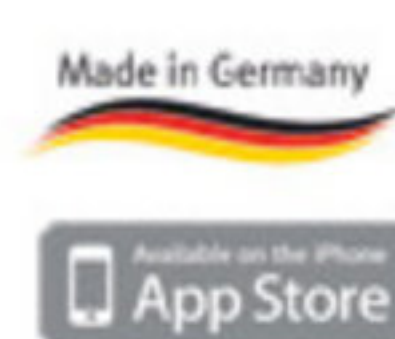

### Contact Us
