

passion for sports grounds

Exclusive invitation to the M-Infill launch party in Italy.

Dear customers,

we are pleased to offer you a very special opportunity: As a valued customer, you are exclusively invited to experience our brand new recycling system, the M-Infill, live in action.

Innovative recycling system for filling material

The M-Infill was specially developed for the precise separation of different filling materials. This minimizes waste and reduces possible environmental impact. The recovered resources can be further processed. With this innovation, SMG is expanding its portfolio for the recycling of artificial turf, thereby making another important contribution to the value chain.

Don't miss the celebratory presentation of a technological advance!

Here is the most important information about the event:
