## NEW BATCH MIXER: SMG MixMatic M140

### New MixMatic M140: Robust batch mixer for playground construction, landscaping and small-area pavers

Dear valued customers,

**With the MixMatic M140, SMG presents an innovative batch mixer that was specially developed for the efficient processing of binding agents and rubber granulate.**

This powerful, robust and flexible device is ideal for applications in playground construction, landscaping and for customers with small-area pavers.

#### Maximum efficiency and easy handling:

- **Fast mixing time:** Homogeneous mixtures in less than 2 minutes.
- **Flexibly adjustable filling height:** 1053 mm to 1353 mm for ergonomic working.
- **Powerful electric drive:** Highly efficient mixing movement at 50 rpm.
- **Easy to clean:** Adjustable mixing tool for quick maintenance.
- **Optimal control:** Freely positioned mixer drum for an unobstructed view of the mixing process.
- **Safety features:** Filling grid with integrated safety shutdown.

#### Mobile and well thought out

The well thought out chassis with pneumatic wheels and hand drawbar ensures that the mixer can be moved easily. Thanks to the quick-release fasteners, the wheels can be securely fixed, while the hand drawbar can be stowed on the device to save space.

#### Ideal for small-area pavers

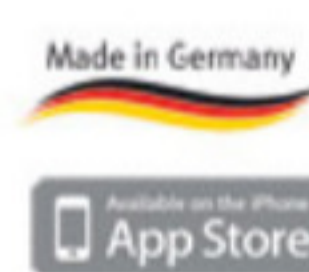

The performance of the MixMatic M140 is specially tailored to small pavers with a working width of up to 1.5 meters (e.g. PlanoMatic P208, P211 or P215). This makes it perfect for professional applications where precise mixing and flexible handling are required.
